

A word cloud visualization of biological database identifiers. The most prominent words are 'chebi' and 'go'. Other significant terms include 'ncbitaxon', 'uberon', 'taxon', 'accession numbers' (e.g., 000756, 000763, 000790), and 'protein'. The colors range from green to blue, and the font sizes vary significantly, indicating the frequency or importance of each identifier.
